DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 10-12,19-22** are rejected under 35 U.S.C. 102(b) as being anticipated by US 2930162 (herein 162).

For claim 10, 162 teaches a cover 26,29 for use with a container having suitable means for growing the at least one plant variety accessible to animals for grazing, the cover constructed and arranged to enclose the container and to prevent animals from displacing the cover relative to the container when enclosed, the cover having a plurality of openings 28,31,29 being dimensioned to form a passageway for the at least one plant variety growing through the plurality of openings while the cover preventing a limb from an animal from entering through any one of the plurality of openings. See also col. 4, lines 15-40).

For claim 11, 162 teaches wherein the cover has at least one large opening 28 dimensioned to allow a person to extend his/her finger through the at least one large opening to determined moisture content.

For claim 12, 162 teaches wherein the cover is made of material suitable for supporting weight applied on the cover by a cat. The openwork or meshwork material of 12 is suitable for supporting weight applied by a cat.

For claims 19-21, 162 teaches wherein the cover further includes a frame 30 having four side walls which are dimensioned to mate with four corresponding side walls 25 of the container. Note the shape of both the container and cover, this shape of clover leaf has four circular sections and each section has walls 30 corresponding to the same clover leaf container walls 25.

For claim 22, 162 teaches the cover further includes attachment means 30 for connecting the cover to the container.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claim 23** is rejected under 35 U.S.C. 103(a) as being unpatentable over 162 (as above). It would have been obvious to one having ordinary skill in the art at the time the invention was made to grow a plant variety of grass seeds in the device of 162, depending on the user's preference to do so to grow his/her choice of plant variety because the device of 162 is capable of being used to grow other varieties of plant.
